

Liquid Crystal Rainbow Pendant

Awareness Jewelry combining Illumination (esclaire) & All Known Phases of Matter

Subtle Spectral Delights

Uri Geller's frame of reference encompasses a special blend of optimism with broadspectrum application. For Uri, the LC Rainbow Pendant coincides with his own unique conceptional view of the material world. He feels the pendant „bends to the touch“ of mind, bringing forth a positive resonance to stimulate the senses and illuminate the human spirit. *„For me the pendant is a spectacular light show. Here we have all known phases of matter consolidated in one place and it fits nicely into the palm of your hand.“*

„**Esclaire**“ (meaning illumination) is an old french word, once used by poets in the medieval times. Though it's literary luminescence has now faded - like a star - Uri believes it's connotation still continues to speed lightyears into the future. Uri draws upon esclaire and esclaire draws upon Uri - yielding pure inspiration. Uri feels the LC Rainbow Pendant with it's brilliant display of color-shifts through the reflection of light serves to emphasize the esclaire concept.

„All colors of the visible light spectrum - red, orange and yellow to blue, Indigo and Violet radiate power and energy. They bring the mind and soul new impulses and a postive feeling of life. Use the brilliant Rainbow spectrum reflected by the liquid crystals to motivate your Mind.“

Unisex - Jewelry
for Women / Men
